

11/16/60

Dear Joshu.

I sent a translated paper ^{and a copy of original paper} _^ few days back, entitled "The ultraviolet filter for isolation of 2537 A line of Mercury quartz lamp" which you asked to translate.

DR. Y. Hoshino sent his papers to you separately, too. I afraid that my translation is not very good and may possibly made some mistakes, so, if there are any questions, please don't hesitate to write me, and if you have the other papers to be translated it is also my pleasure to do it.

It was pity to take so long time for sending them, but was not avoidable by genetics meeting held in Hukuoka which is a capital city in Kyushu-island.

In the meeting, Tetsuo was there, and we had nice talk about you and Esther and pleasant experiences in your lab. His work seems going very well.

Alan Garen asked to me on our F' paper which we are going to publish. Because, now he is going to publish his paper on "Repression of phosphatase", and the work has been done using F₁₃, and also doing complementation work on P-locus, and he like to quote our work.

Consequently, I would like to know on the ^{paper:} _^ date, name of the title, Journal and so on.

It also make great help to get my job which now I am looking for ^{in University of Osaka} _^, as you know it is very hard.

This space is also for correspondence.

(2)

please give ^{my} best regards to Esther and the other
people in your lab.

Sincerely yours.

Gutimov
